

The Latest in USA / China Tariff Discussions from Deco Products!!

Again, this week the USA and China trade agreement (or lack of) became very newsworthy.

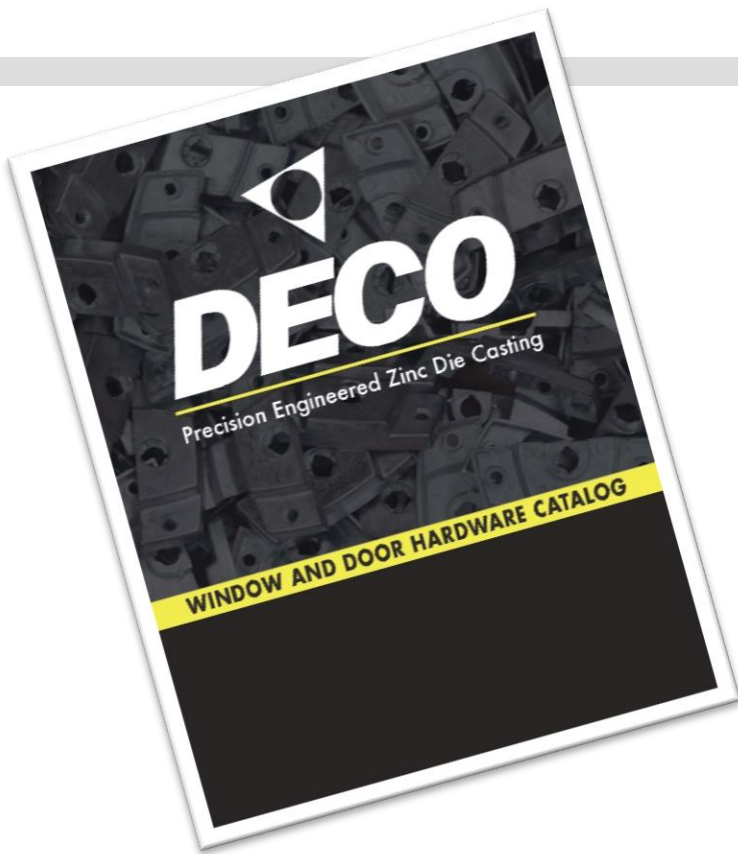

As our last few newsletters indicate, we at Deco Products have been monitoring these discussions closely. This is a special newsletter for this week, as this topic intensifies. Many of the pundits are commenting on the effects of uncertainty to the stock market, but we also know how this is affecting our manufacturing industries and many of our customers and partners. We understand that these are uncertain and stressful times!

Please know, as a prominent “Made in the USA” zinc die-caster we continue to have discussions with the industry on how we can support existing and new customers with great value solutions. We always strive to be a great value and a source of “stress-free” supply. We have to be globally competitive and our investment in equipment, systems, and our employees is key to meet our customer expectations for great value.

We are further encouraged with our success for great quality, on-time delivery, and customer support. We know that these qualities are very important for the total value proposition for our customer/partners. We can only succeed; if we help our customers succeed. This has been true in the past, but is ever more apparent with today’s turbulent global supply chain. Please contact Deco Products if we can support you further at websales@decoprod.com.

Below are new worthy links to examine some of the more recent developments with possibly increasing tariffs on zinc castings coming from over-seas.
