

## **The Latest News from the Leading Designer and Producer of Zinc Die Casting Solutions**

### **DECO – Committed to Service Without Interruption**

In our turbulent times, please remember Deco's continued emphasis to be a reliable and cost-effective supplier of zinc die castings.

In recent days, many of our key partners have reached out to us asking about any disruption concerns and plans for risk mitigation and supply chain contingencies.

Deco, as a "Made in USA" manufacturer, is a time tested producer of zinc die castings. We have taken steps to ensure a reliable, continuous supply of product to all of our customers.

We are debt-free and rely on our proven manufacturing capabilities and other established domestic sources to provide a robust supply chain and maintain consistent shipment delivery without disruption to our customers.

# Deco: Sixty Years Strong

60

In 2020, Deco will be celebrating 60 years of service to our customers. Born out of the heartland and always “Made in the U.S.A.”, Deco Products is the largest stand-alone dedicated zinc die caster in North America. We have continued to grow our business through a commitment to excellence and dedication to the success of our customers since 1960!

Being in business this long speaks volumes for the value we offer our customers; cost savings, exceptional quality, on-time delivery, friendly customer service, innovative solutions, engineering collaboration and design support. We have the resources and capacity to grow with you. Our expert and committed personnel are available to support and solve technical or logistical problems. Partnering with Deco provides you the security of a trusted source to supply your enterprise with the highest quality precision cast parts for the life cycle of your products.

Deco Products is family owned and financially strong. Our ongoing capital investments and commitment to continuous improvement reflect our long-term perspective to produce the finest zinc castings and assemblies made in America. As we continue to enhance our processes, we welcome opportunities to create partnerships with companies equally committed to excellence.

We respect our past and appreciate the knowledge and expertise gained throughout the years, but we also understand today’s need to “push forward---to further innovate for continuous improvement and excel in today’s global economy.

***On behalf of our entire staff, THANK YOU for allowing us to serve you - and here's to 60+ more years of partnership with our customers and community.*** A large part of Deco's success is based upon interactions with our customers and the sharing of valuable ideas. If you have ideas to share with us, **please click here to reach our management team.**

## A Look Back at 2019: Reflecting on Solutions and Service for Our Customers

- Deco added some new “horsepower” to its line-up of zinc die-casting equipment with the installation of the “Producer USA.” This 500-ton zinc die-casting machine gives Deco the capability to produce larger parts as well as adding more capacity for growth.
- Deco increased robotic and automation capabilities, providing further “tools” for consistent high-quality production at globally competitive values.
- Deco continued to be a reliable and stress-free source of steady supply despite other 2019 global concerns.
- Deco focused on further website development, including video content and other ways to share our story with prospective employees and support existing and new customers.
